Into the project

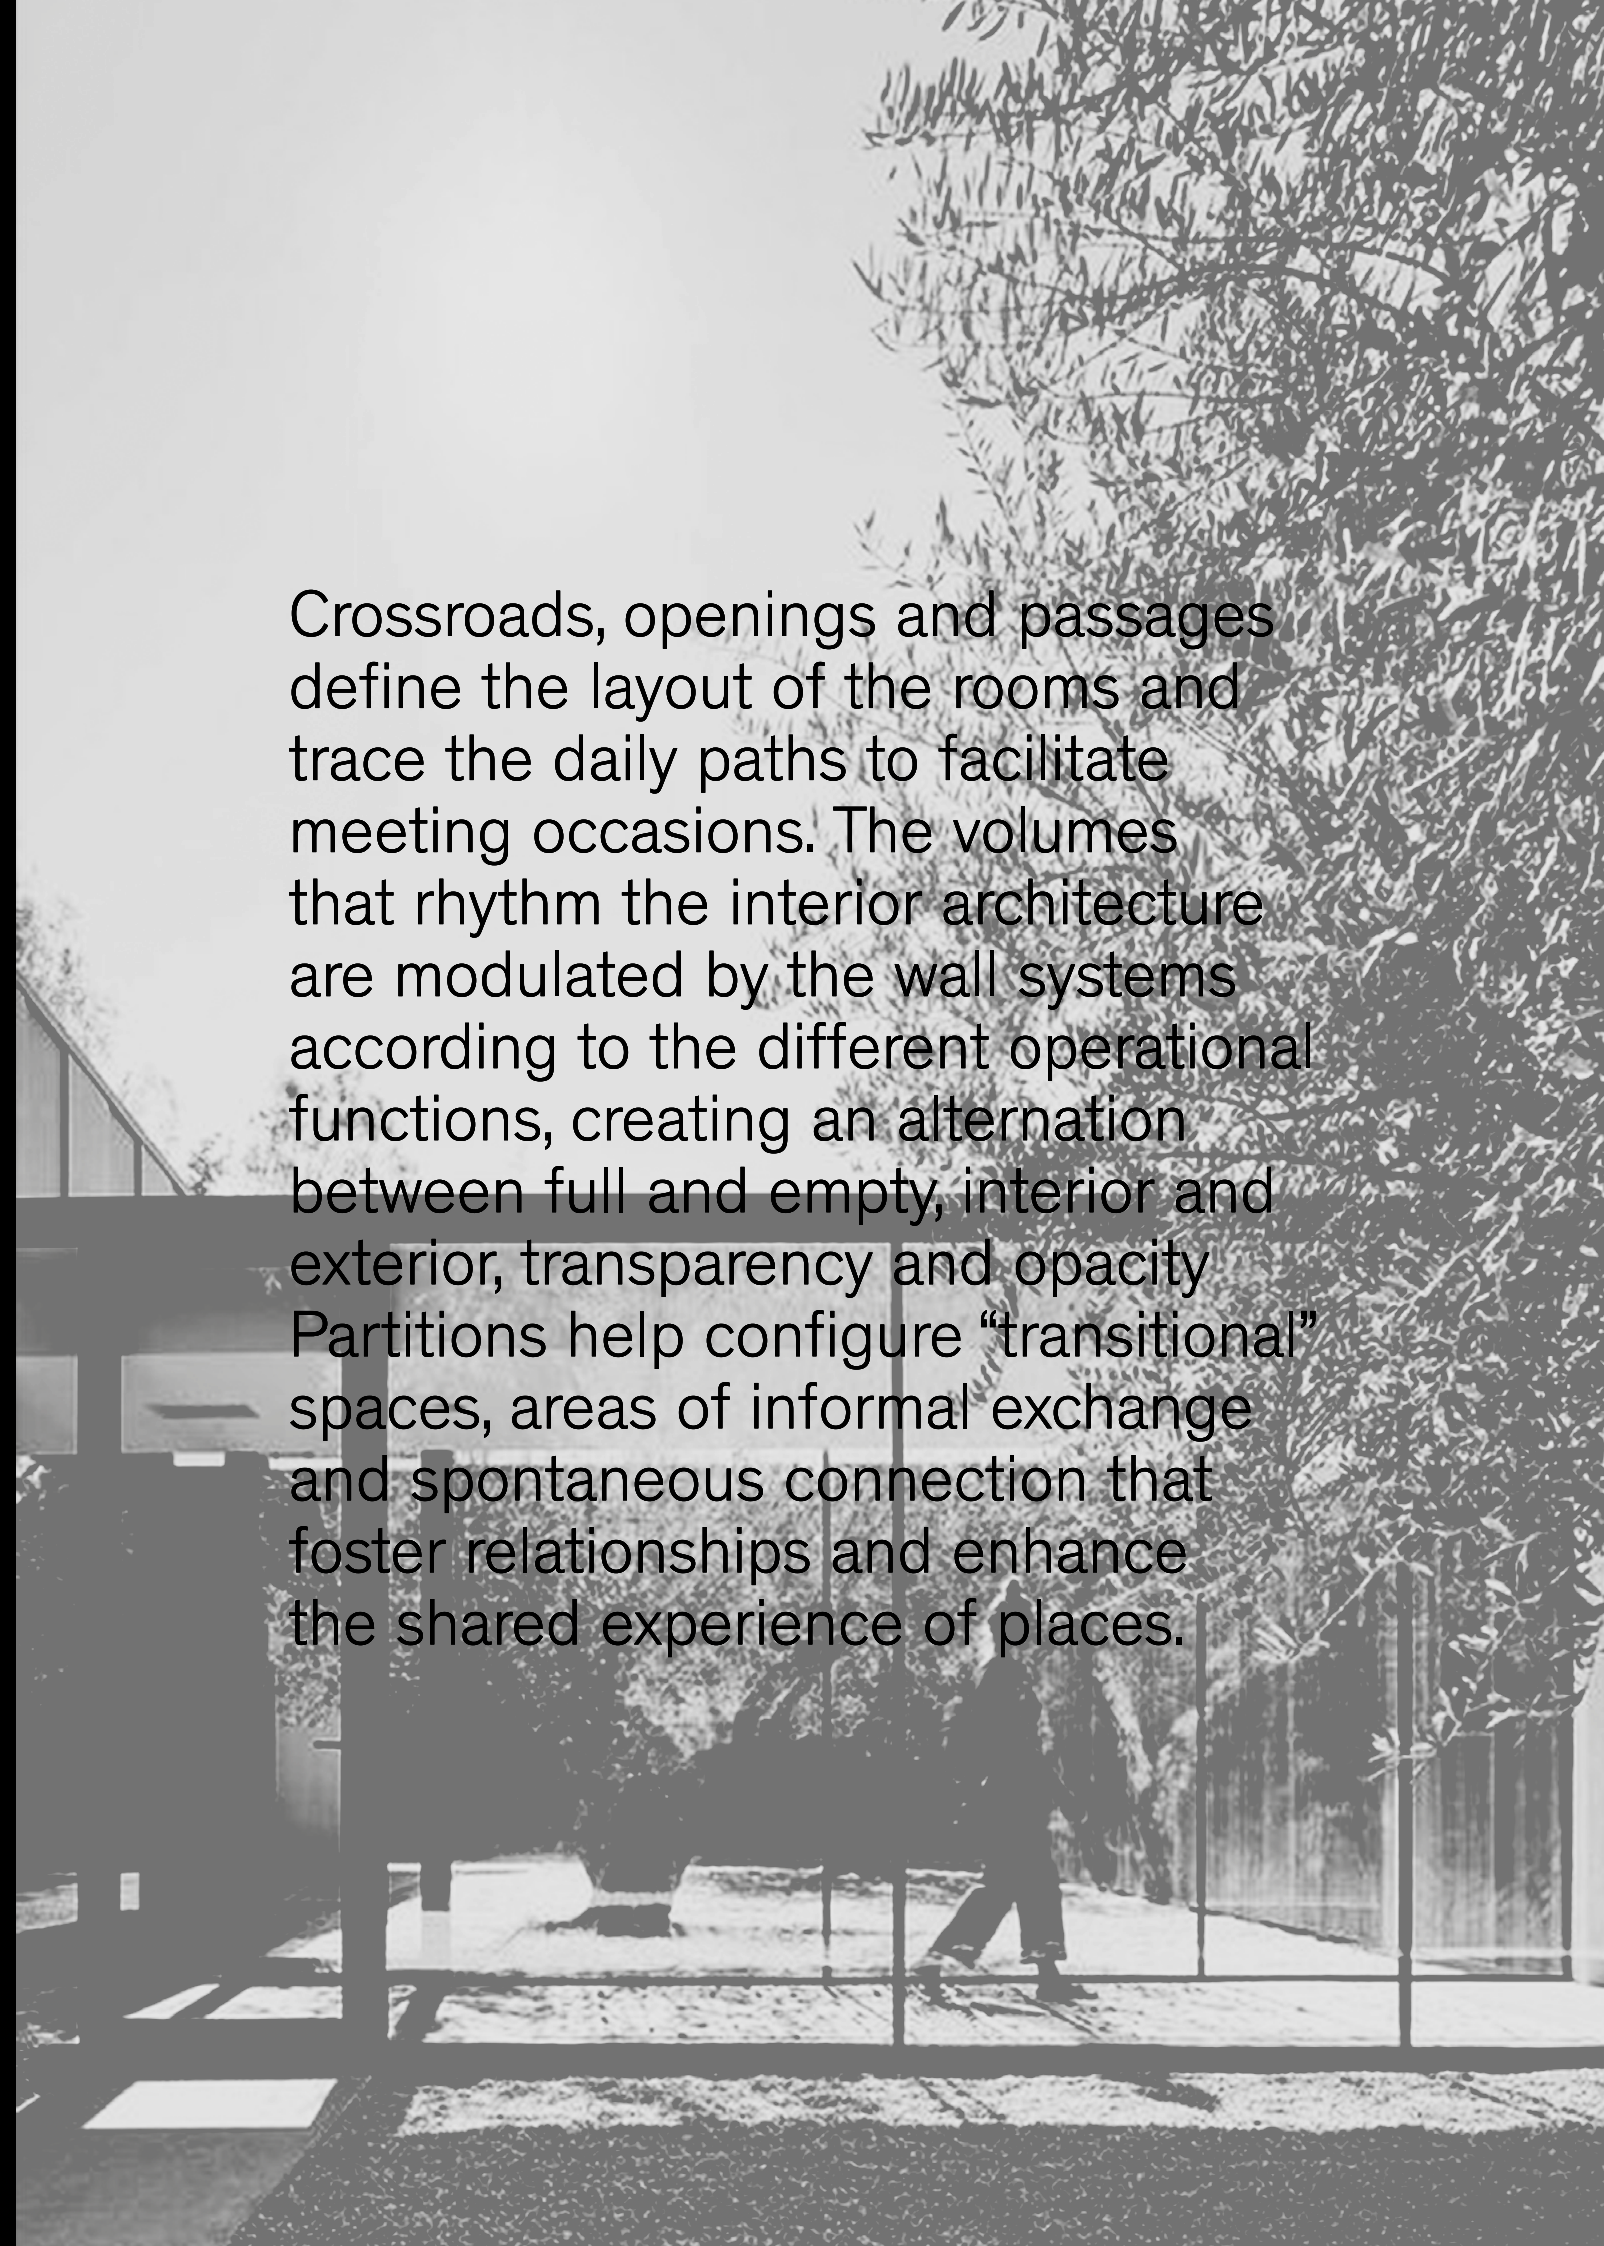

Transitional spaces

AUTMIND

Transitional spaces

Incroci, aperture e passaggi definiscono il layout degli ambienti e tracciano i percorsi quotidiani per facilitare le occasioni di incontro. I volumi che ritmano l'architettura interna sono modulati dai sistemi parete in base alle diverse funzioni operative, creando un'alternanza tra pieni e vuoti, interno e esterno, trasparenza e opacità. Le partizioni contribuiscono a configurare spazi "transizionali", aree di scambio informale e connessione spontanea che favoriscono le relazioni e migliorano l'esperienza condivisa dei luoghi.

Crossroads, openings and passages define the layout of the rooms and trace the daily paths to facilitate meeting occasions. The volumes that rhythm the interior architecture are modulated by the wall systems according to the different operational functions, creating an alternation between full and empty, interior and exterior, transparency and opacity. Partitions help configure "transitional" spaces, areas of informal exchange and spontaneous connection that foster relationships and enhance the shared experience of places.

Parete monovetro
leggera e versatile

Light and versatile single
glass partition wall

Slim
Partition wall

Epica
location: Mestre (VE), Italy
project: H&A Associati
product: Slim Partition wall

Design essenziale e profilo sottilissimo consentono di suddividere gli spazi in modo leggero e con il minimo impatto visivo.

Essential design and a very slim profile allow space divisions with minimal visual impact.

Un sistema flessibile Flexible system

Sistema di pareti tra i più compatti in commercio: un unico binario supporta diverse composizioni, garantendo un ingombro minimo che mantiene la massima funzionalità.

One of the most compact wall systems on the market: a single profile supports several compositions, ensuring a minimal design while maintaining maximum functionality.

Parete singola multifunzionale

Multifunctional single glass
partition wall

**Sistema monovetro
altamente flessibile che
permette di organizzare
facilmente gli ambienti e
di ri-configurarli in seguito
disegnando infiniti layout.**

Highly flexible single-glass
system that allows rooms to
be easily organised and later
re-configured by designing
endless layouts.

Screen System

La soluzione brevettata

The trademark solution

Patented Technology
EP3480411A1

Il brevetto di Autmind per gestire agevolmente luminosità e privacy: nell'intercapedine tra i vetri è possibile inserire una tenda scorrevole, che alloggia il rullo a scomparsa all'interno del binario superiore.

Autmind's patented system for easy management of brightness and privacy: in the gap between the glass modules it is possible to insert a sliding blind, which houses the retractable roller inside the upper track.

La parete architettuale

The architectural wall

Parete doppia portante di grandi dimensioni costituita da elementi modulari interamente finiti prima della posa, accostabili sia in orizzontale che in verticale per creare molteplici soluzioni compositive.

Large double loadbearing system consisting of modular elements entirely finished before installation, which can be combined both horizontally and vertically to create multiple compositions.

Specializzata nella realizzazione di partizioni e pareti divisorie, Autmind ha applicato la propria expertise nella lavorazione dell'alluminio per sviluppare soluzioni innovative, su misura e di alta qualità destinate alla configurazione degli spazi. Tutte le fasi di progettazione, realizzazione, imballaggio, spedizione e servizio post vendita vengono gestite internamente con la massima cura. Autmind ha all'attivo numerose realizzazioni ed è in grado di porsi come partner per gli studi di architettura e i contractor nell'intero processo dalla consulenza tecnica al cantiere.

Specializing in the fabrication of partitions and partition walls, Autmind has applied its expertise in aluminum processing to develop innovative, customized and high-quality solutions intended for space configuration. All stages of design, fabrication, packaging, shipping and after-sales service are handled in-house with the utmost care. Autmind has numerous realizations to its credit and is able to position itself as a partner for architectural firms and contractors in the entire process from technical consultation to construction site.
